

AOI GAUGE R&R ANALYSIS REPORT

Machine Name:	LX0959166669	DOCUMENT REVISION :		PERFORMED BY:	潘佃锦
Number of Parts:	10	Gauge Name:	Holly AOI REPORT		
Number of Trials:	3	Specification:	6 σ , Tolerance: $\pm 50\%$		
Number of Operators (op):	3	analytical method:	ANOVA		
		calculating tools:	MiniTab		

GAGE R & R SUMMARY

GR&R for X offset: 1.14%

GR&R for Y offset: 1.07%

- ☒ The measuring system can accept.
- ☐ acceptable or unacceptable, the decision on the importance of the measurement system.
- ☐ The measuring system can not be accepted and Improvement

verdict: The measuring system can accept.**Approved:** 朱文仙 2025. 11. 21

1: This notification serves to certify that the unit described above has been inspected and tested in accordance with specifications published by Test Research, Inc.

2: The accuracy and calibration of this instrument are traceable through the of imaging system.

3: Test data, see supporting statements.

4: 此次测试采用10个零件Part点, 3个操作员, 每个操作员测试3次得到的数据进行GR&R计算
